Dear Customer,

We hope you and your family had a safe and healthy summer this year. Cold weather is around the corner, and now is the time to schedule the winterization of your boat. Complete this form and send to your Russell Marine location. This form is also available online at [www.russellmarine.net](http://www.russellmarine.net). This signed letter will be verification of your request to winterize. The winterization process includes removing boat from storage; adding fuel conditioner to gas; running boat to circulate treatment and get oil hot; changing of oil, oil filter and fuel water separator filter (if required); greasing steering and fittings; checking lower unit lube and top off; removing drain plugs from manifold(s) (engine block cooler); draining bilge; and returning to storage. We thank you for your business!
